

## **Amendments to the Claims**

This listing of claims will replace all prior versions, and listings, of claims in the application.

1-14. (Canceled)

15. (Currently Amended) A medical data recording method comprising:
  - receiving medical data through a software module and parsing patient identification information and study information from the received medical data,
  - storing the parsed patient identification information and parsed study information, noting the end of the received medical data through the software module for each patient,
  - creating a job containing medical data, medical data viewing software, and a print file for an autoloader control software, the print file having the stored parsed patient identification information and the stored parsed study information,
  - submitting the job to the autoloader control software, and
  - recording a disc based on ~~with the data produced by the job such that the medical date viewing software is recorded on the disc along with the medical data~~ and printing a template containing the stored parsed patient identification information and the stored parsed study information on the disc to label the disc.
16. (Previously Presented) A medical data recording method as in claim 15 further comprising a step of,
  - loading the viewing software which automatically loads and displays the medical data after disc insertion in a computer.
17. (Canceled)

18. (Previously Presented) A medical data recording method as in claim 15 further comprising a step of,  
backing up the medical data on a disc .
  
- 19-24. (Canceled)
  
25. (Previously Presented) A medical data recording method as in claim 15 further comprising a step of,  
processing the received medical data to comply to DICOM standards.
  
26. (Previously Presented) A medical data recording method as in claim 15 further comprising a step of,  
storing the job after the job has been created.
  
27. (Previously Presented) A medical data recording method as in claim 26 further comprising a step of,  
deleting the job after submitting the job to the autoloader control software.
  
28. (Previously Presented) A medical data recording method as in claim 27 wherein deleting the job occurs automatically after recording of the disc has completed.
  
29. (Previously Presented) A medical data recording method as in claim 15 wherein creating the job comprises utilizing a print file that includes a print template and print merge data.
  
30. (Previously Presented) A medical data recording method as in claim 15 wherein noting the end of the received medical data for each patient comprises utilizing a time out period.
  
31. (Previously Presented) A medical data recording method as in claim 15 wherein recording the disc comprises utilizing a CD.

32. (Previously Presented) A medical data recording method as in claim 15 wherein recording the disc comprises utilizing a disc having a format selected from a group consisting of: CDR, CDRW, DVD-R, DVD-RW, and DVDRAM.
